Re: *Dobson Cellular Systems, Inc.*
E911 Quarterly Report – CC Docket No. 94-102

Dear Ms. Dortch:

Dobson Cellular Systems, Inc. and its subsidiaries, by its attorneys, hereby submit the attached E911 Quarterly Report on their progress toward and compliance with the terms and conditions of the *Order to Stay* and the Commission's E911 rules.¹

If there are any questions regarding this matter, please contact the undersigned.

Sincerely,

WILKINSON BARKER KNAUER, LLP

E911 Status – Quarterly Report

CC Docket No. 94-102

May 3, 2004

Summary of Report

Pursuant to the *Order to Stay* and the Commission's Public Notice dated June 6, 2003,¹ Dobson Cellular Systems, Inc.,² as a Tier II carrier, provides this E911 Quarterly Report ("Report"). The Report provides information on all Phase I and Phase II requests received by DCS, including: the PSAP ID, Name, State, County, Implementation Phase, Air Interface, Date PSAP Request Made,³ Date PSAP Request Withdrawn, Invalid Request, Deployed, Date Deployed, Date Projected, Reasons and Comment. Detailed information regarding the requests is contained in the attached chart.

Phase I Service

DCS has received 75 requests for Phase I services and has activated service in 67 of these jurisdictions. DCS has worked diligently with its third-party location solution vendor, Intrado, as well as the public safety community, in coordinating Phase I deployment. The company remains committed to working with its vendors, the PSAPs, and state and local governments, in order to deploy Phase I services in these jurisdictions as soon as possible. Note that DCS sold its Maryland 2 RSA market to a competitor and, therefore, has removed previous Phase I requests from this Report (including Talbot, Kent, Somerset, St. Mary's, Caroline, Calvert, Worcester and Dorchester Counties, MD).

Phase II Service

A. Deployment Preparation

As discussed in its waiver petition, DCS is a mid-sized carrier servicing predominantly rural and suburban markets in 11 states. The company relies primarily upon a TDMA-based network of base stations and switching equipment.⁴ DCS's network consists of approximately 22 Mobile Switching Centers, a majority of which utilize equipment manufactured by Nortel

¹ See *Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems*, CC Docket No. 94-102, *Order to Stay*, 17 FCC Rcd 14841 (2002) ("Order to Stay"); See Public Notice, "Wireless Telecommunications Bureau Standardizes Carrier Reporting on Wireless E911 Implementation," DA 03-1902 (rel. June 6, 2003).

² The instant Report is filed on behalf of Dobson Cellular Systems, Inc. and its subsidiaries (collectively "DCS"). A separate report is being filed for American Cellular Corporation ("ACC"), which is an affiliate of DCS.

³ As indicated in the attached chart, the provided "request date" indicates the date the PSAP/requesting entity sent its request to DCS. This date may not correspond with the date the PSAP's/requesting entity's request was "valid" per Section 20.18(j) of the rules. 47 C.F.R. § 20.18(j); see also *Revision of the Commission's Rules to Ensure Compatibility with Enhanced E911 Emergency Calling Systems*, *Petition of City of Richardson*, CC Docket No. 94-102, *Order*, 16 FCC Rcd 18982, 18986-87 (2001) ("Richardson").

⁴ As noted by the Commission, DCS is in the process of overlaying its TDMA network with GSM/GPRS technology. See *Annual Report and Analysis of Competitive Market Conditions with Respect to Commercial Mobile Services*, *Eighth Report*, 18 FCC Rcd 14783, 14821 (rel. July 14, 2003).

Networks (“Nortel”), the rest utilizing Lucent Technologies (“Lucent”) TDMA network equipment. DCS has worked with these equipment vendors to prepare for Phase II deployment, as all switch upgrades necessary to supply Phase II services were completed by Lucent by August 2002 and by Nortel by June 2002.

In addition, DCS has executed an exclusive contract with Andrew Corporation to provide the Position Determining Entity equipment necessary to deploy its Phase II network-based location solution. The vendor has contracted to provide compliant Phase II services for all its Phase II requests. DCS is currently deploying Phase II services in accordance with mutually agreed to timetables, which have been negotiated or are currently under discussion with PSAPs.

B. Phase II Requests

DCS has launched Phase II service in the following jurisdictions: Erie County, PA; Allegany, Cattaraugus, Chautauqua and Genesee Counties, NY. DCS has received requests for Phase II service from the following jurisdictions: Anchorage, AK, Tuscola, Mason-Oceana, Lake, Sanilac, Charlevoix, Leelanau, Emmet, Huron and Cheboygan Counties, MI; Austin and Henderson Counties, TX. The status of these requests is detailed in the attachment. For each request, DCS is proceeding with deployment in good faith, even for PSAPs who have not yet provided *Richardson* documentation. Note that DCS sold its Maryland 2 RSA market to a competitor and, therefore, has removed previous Phase II requests from this Report (including Talbot and Somerset Counties, MD).

To ensure that it may properly prioritize its E911-designated resources, DCS has requested each of these PSAPs to provide documentation pursuant to the *Richardson* criteria.⁵ DCS has received a response to its request from all of these PSAPs and is proceeding in good faith and has signed a contract with Andrew Corporation to provide Phase II capabilities in all of the counties stated above. DCS has also requested that the PSAP provide documentation pursuant to the *Richardson* criteria,⁶ and was notified by the LEC that the county is not ready to accept Phase II at this time. Finally, on February 11, 2003 DCS sent correspondence to Austin County requesting documentation pursuant to the *Richardson* criteria. DCS has received a reply from the county and considers Austin County’s request valid.

C. Deployment Issues

In order to meet the Commission’s network-based accuracy requirements, Andrew Corporation has informed the company that it will need to install Angle-of-Arrival (“AOA”) antennas at certain cell sites in addition to the Time Difference of Arrival equipment that will be installed in individual cell sites. DCS has also been informed that installing AOA antennas may require tower modifications, lease modifications, and zoning approvals – any of which present the potential for delay.

DCS brought similar matters to the Commission’s attention in its original waiver request.⁷ Accordingly, if necessary, DCS may avail itself of further waiver procedures to

⁵ *Richardson*, 16 FCC Rcd at 18986-87.

⁶ *Id.*

⁷ See DCS Petition for Waiver of Sections 20.18(e), (f), and (h) of the Commission’s Rules, CC Docket No. 94-102, at 11-15 (filed Sept. 4, 2001).

account for the potential market-specific shortcomings a network-based solution in its rural markets may present. The Commission has indicated that it will consider such requests.⁸

As required by the *Order to Stay*, a copy of this report is being filed with the Chief of the Enforcement Bureau, the Chief of the Wireless Telecommunications Bureau, and the Executive Directors and Counsels of APCO, NENA, and NANSA.

⁸ See *Order to Stay*, 17 FCC Rcd at 14853.
